

Foedus Bolsters National Presence With Opening of Dallas Office

Significant Demand for Foedus' Professional Services Drives Expansion

Portsmouth, NH – June 18, 2007 — Foedus, a leader in Virtual Infrastructure technologies and services, in response to increased demand, announced today expansion into the South Central region to support the company's aggressive growth strategy.

"With over 600 installations in the past several years our world-class delivery of professional services for Virtual Infrastructure technologies continue to enjoy tremendous demand, growing at a 80% rate year-over-year," said Michael Reilly, President and CEO of Foedus. "The growth potential of Virtualization and related services is significant and the South Central region is the ideal location to expand our service offerings."

Foedus selected Dallas based on the high number of organizations that adopt emerging technologies to improve their business efficiencies and increase revenue. "The implementation of Virtualization is accelerating and Foedus is well positioned to establish a leadership position in the South Central region," said Michael Rennell, Vice President of Sales and Marketing for Foedus. "We will continue to increase our presence with regional offices and increase our channel presence through new business alliances nationwide."

"We're thrilled to be part of the greater Dallas business community and looking forward to providing the professional services that will help companies realize a measurable return on their Information Technology investments," concluded Reilly.

About Foedus

Foedus is a leading provider of Virtualization technologies and services to companies worldwide. We specialize in helping organizations utilize the unique aspects of these emerging technologies to solve common IT challenges in new and dynamic ways. Foedus offers a unique combination of consulting talent and implementation expertise to companies wanting to realize the benefits of virtualization. Foedus has established partnerships with the very best hardware and software vendors in our areas of specialization and we are committed to assisting our customers in the evaluation of all potential solutions, including the optimization of current IT assets. This approach combined with our proven engagement methodology enables us to develop and deliver cost effective solutions. At Foedus we deliver Virtual Technologies with Real Results."
